# E-SPRAY GUNS

Since the outbreak of Covid-19 premises are needing to be sanitised regularly, which results in increased labour costs. The solution is to switch to mechanised sanitisation, which raises the level of hygiene, is quick to carry out several times a day and guarantees constant results at a remarkably low cost.

## E-SPRAY ELECTROSTATIC SPRAY GUN

- Electrostatic
- Lightweight & Comfortable
- Extremely mobile
- Crossbody strap included
- 4 hour hygienization on a single charge

# HOW THE E-SPRAY ELECTROSTATIC GUN WORKS

The electrical charge provided to the liquid causes the particles to spread evenly over the surfaces. The cloud of electrostatic particles envelops objects at 360° and completely sanitises them.
