

VIRUSKILLER™

SAFE INDOOR AIR EVERYWHERE

VIRUSKILLER™ provides real time protection against airborne allergens, pollutants and viruses.

Did you know.....

- That a single sneeze can carry up to 40,000 virus containing droplets?
- Smaller particles from an infected individual can remain airborne for several hours.
- Small droplets can travel up to 8 meters at speeds of up to 320 km/h and can be carried around by the air conditioning system, quickly spreading the virus.

Radic8 technology cleans dirty air, kills sick air and neutralises toxic air.*

The solution:

- **Radic8's VIRUSKILLER™ technology** kills 99.9999% of airborne viruses, bacteria, fungi and mould on a single air pass
- **Single air pass kill rate**
- **Reduces surface contamination** by 99.81%.
- **Test results show** none of the 16 pathogens tested were present after passing through the VIRUSKILLER™ including SARS-Cov-2 (Novel Corona Virus), or COVID-19.
- **Clean air within 1 hour** of installation.
- **Plug and play easy set-up**, portable units, which fit all room sizes.

*Setti, L. et al: "SARS-Cov-2RNA Found on Particulate Matter of Bergamo in Northern Italy: First Preliminary evidence."

VIRUSKILLER™ is The World's Highest Certified Clean Air Technology

The technology – small yet powerful

Reactor Cell

Hextio is based on the patented VIRUSKILLER™ technology, the highest certified clean in technology today. It uses UV-C and TiO₂ (titanium dioxide) photocatalytic surface to create the world's most powerful oxidants, hydroxyl radicals. The patented Hextio chamber utilises ultimate reflection and refraction to amplify the power of the UV lamp by 10 times. Even though Hextio is small in size, it is big in capacity. With a 99.9999% kill rate on respiratory viruses in a single air exchange. Hextio is designed to keep you safe.

Hextio

Hextio is personal air protection. Ideal for an individual with the unit situated on a desk, counter, table, in a private vehicle, or on the go in areas up to 20 m².

- Deactivate viruses and bacteria
- Eliminate high levels of pollution
- Effectively remove noxious gases and larger particles

VK401

The perfect air steriliser for smaller commercial spaces and for home (medium to large rooms). Neutralises pathogens in large areas up to 60 m².

- Sterilised air
- Contaminated air

VK 102

VK 102 neutralises pathogens in large areas up to 165m².

- Low running costs
- Simple installation and maintenance
- Free standing

Ideal for complete negative pressure sterilisation. Negative pressure is required when the priority is to ensure contaminants from one room do not escape to another.

VIRUSKILLER™ destroys the widest range of airborne pollutants

Viruses

Bacteria

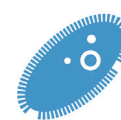

Pollen

Formaldehyde

Mould

Spores

Nitrogen Dioxide

Hazardous Vapours

VOCs

Allergens

Exhaust Fumes

Particulate Matter

Single air pass

Lab tested technology that kills viruses and bacteria with near 100% kill rate on a single air exchange.

Air Sterilisation

The patented Reactor Chamber neutralises all pathogens and harmful airborne microorganisms.

Controlled airflow

Engineered laminar airflow to take the dirty air away and replace it with surgically clean air.

Branded wraps available
